**Subject:** Monday 9/18/06 SW Sediment Sampling at KCIA

Hi Fritz:

Anchor Environmental is going to come out to IW and KCEL tomorrow to collect supplies for the KCIA stormwater sediment sampling event to occur on Monday (9/18). Please have the following items ready by mid-morning tomorrow:

- Cooler
- 13 sets of containers for the following analyses: PCBs, SVOCs (PAH & Phthalates), TPH, TOC, Total Solids
- The telescoping metal pole that was used for the June sampling of the KCIA stormwater vaults
- 6 4-L stainless steel beakers with holes drilled in the rim (Note: The ones IW used for the June sampling event. It is okay to go into the "IW Cage" and pull these out. If you have time, it would be nice to have them pre-cleaned, although Anchor can also do it back at their shop.).

Thanks,

Bruce
